# Managed Services - Database Management

Managed services offer a host of support functions to help organizations improve their performance on the cloud. UnitedLayer 's solution for database management helps businesses reduce data redundancy and boost data integrity, along with security. Our experts in database design, management, and monitoring have the experience, accuracy, and revised know-how.

We offer 24/7 coverage across a variety of cloud delivery technologies, operating systems, database disciplines, and applications. Our Database Management service provides unmatched database management capabilities on which businesses can depend.

Architecture Design

UnitedLayer 's database consulting services will help you create a more efficient, lean, and reliable database environment leading to an efficient enterprise technology set-up. Whether it's reliable connectivity management or foundational system architecture, our consulting services will help you maintain the optimal performance of your database.

We support SQL databases like Microsoft SQL Server, MySQL, PostgreSQL, Oracle, and others. Our consulting engagement includes the design and implementation of database architecture, management, and monitoring of databases, upgrade and migration of databases and backup and recovery of databases.

Administration and Monitoring

Our database administrators provide 24/7 support in managing and monitoring database applications. We help businesses in database access administration, database tuning, query automation, software updates, and security management. UnitedLayer implements, configures, and provides 24/7 support to all 3rd party database monitoring solutions. Regular alerts help businesses optimize resource allocation.

Upgrade and Migration

UnitedLayer assists upgrades to new releases of Database Management System (DBMS) with the help of specialized scripts and tools. We also help businesses to automate steps of the upgrade process. We facilitate database migration to leading public clouds.

Backup and Recovery

We ensure complete data protection through scheduled backups as per your business requirements. We support both physical and logical backups. In case of a data loss, we provide point in time recovery with zero data loss.

Consulting

UnitedLayer's database consulting services will help your business to create a more effective, lean, and reliable database environment leading to an efficient enterprise technology setup. Be it reliable connectivity management or foundational system architecture, our consulting services help you to maintain your databases for them to perform optimally. Our consulting engagement includes database architecture design and implementation, database administration and monitoring, database upgrade and migration, database backup, and recovery.
