

Managed Services - Disaster Recovery

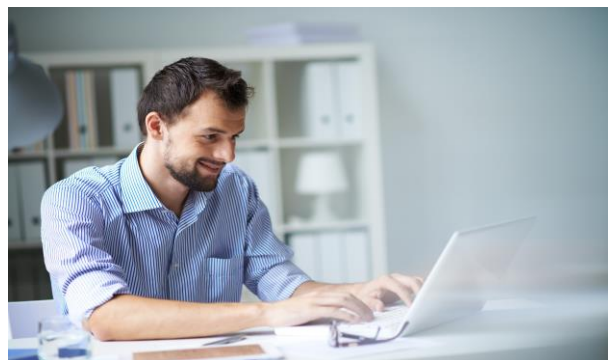

Anticipate, prepare and mitigate highly-customizable, fully-managed and secure disaster recovery solutions

Each day brings new threats and possibilities of unforeseen breakdowns across any enterprise for technology infrastructures. The UnitedLayer disaster recovery solution helps businesses be more resilient and respond more efficiently to these critical circumstances and help them conduct their business without interruptions.

Our DR solutions are highly scalable, where customers can create specific Recovery Point Objectives (RPO) and Recovery Time Objectives (RTO) based on their business requirements. With on-demand scalability, additional resources can be added to meet the growing need for replication; this helps to minimize costs and enhance business flexibility. UnitedLayer's DR solutions are highly secure and compliant with all industry-leading security requirements such as HIPAA and PCI.

Fully Managed DR Solutions

With a fully managed DR solution and 24x7 monitoring and alerts, you can comfortably relax in the knowledge that we are helping you.

On-Demand

UnitedLayer Disaster Recovery services provide additional computing, networking, and storage resources on-demand to meet your increased replication needs.

Security & Compliance

UnitedLayer DR solutions come with industry-leading security technologies to protect your valuable data from any external threats.

The Disaster Recovery solution is also compliant to meet your industry compliance requirements.

Avoid Business Interruptions

Failure in any part of your business process can translate to a loss of revenue, which no business wants to be in. With UnitedLayer's DR solutions, your business can mitigate these risks and minimize time to full recovery.

We provide a highly customized, scalable, and secure enterprise-grade DR solution to help your business keep doing business—even during major IT outages.
