

Managed Services - Security & Compliance

IDENTIFY, RESPOND, AND MITIGATE MULTICLOUD CONTINUOUS SECURITY COMPLIANCE

UnitedLayer's Security as a Service is a security management solution that enables you to proactively identify, respond, and mitigate any security threats against your IT infrastructure. Our comprehensive security management services cater to your on-prem or colocation data centers, managed private clouds, and leading public clouds such as Amazon AWS and Microsoft Azure.

UnitedLayer provides automated, robust, cybersecurity, compliance, and risk management-based programs utilizing the richest set of frameworks, benchmarks, and guidelines available, increasing confidence in the company's security compliance posture.

Our solution delivers the broadest horizontal coverage in the industry, deployable on-premises, within AWS, Google Cloud, and Azure, and will shortly be available as a SaaS offering.

Our up-to-the-minute compliance and risk analysis supplies audit-ready evidence to comply with every major regulatory and security best practice framework and guidelines (including CIS, NIST, DISA, GDPR, SOC, PCI, and HIPAA). A single pane of glass view for compliance automation of diverse, hybrid infrastructures, reduces the labor costs associated with manual compliance efforts.

We provide regular assessments of security vulnerabilities with prescriptive remediations across your entire hybrid infrastructure (cloud, on-premises, and containers). Regular reports/documentation to support compliance with internal security policies to expedite the auditing process.

We have the richest library of security frameworks (NIST, DISA, etc.), benchmarks (CIS OS, cloud, and Docker), and guidelines (SOC, ISO, GDPR, PCI, HIPAA) with advanced compliance mapping. We employ an AI-enabled cyber posture scoring for risk-driven prioritization of vulnerabilities. Complete visibility and management of your entire infrastructure enable continuous improvement of your security posture.

Our cutting-edge security solutions protect client infrastructure from any external security threats. We provide IPsec VPN, SSL VPN, IDS/IPS services for secured access to cloud infrastructure. In addition to this, we provide DoS/DDoS protection against all types of network attacks and threats.

Our application security services ensure the safety and security of your sensitive business information from any security threats. With application penetration tests or ethical hacking, we help organizations identify the security vulnerabilities present in the application. Our secure code analysis enables organizations to verify that proper security controls are present in the application.

UnitedLayer Advantage

UnitedLayer provides the Colocation services from one of the largest data centers in San Francisco, USA, at 200 Paul Ave . We put you on the fast track to growth and help you realize the Full Value of your investment in any Cloud Infrastructure Solutions. We Design, Build, and Manage Enterprise-Grade Colocation Solutions that meet the Performance, Security, and Scalability to serve your Unique Business Needs.
